- Visual Studio Code

ABOUT ME

Computer science graduate, full-stack developer, and business owner based in Las Vegas with experience in web development, server administration, database management, and real-world business operations. As the owner of ScoopersLV, I manage customer communication, scheduling, route planning, billing follow-ups, pricing, and marketing, which has helped me understand how software can improve workflows and solve practical business problems. I have hands-on experience building applications, working with databases, setting up Linux servers, configuring Apache, MariaDB, and Postfix, and developing tools that support small business efficiency.

WORK EXPERIENCE

SCOOPERSLV - OWNER

Las Vegas, NV | January 2026-Present

- Own and operate a dog waste removal business, managing service routes, customer communication, scheduling, pricing, and billing follow-ups.
- Provide hands-on field service for recurring residential clients while maintaining reliable weekly and twice-weekly route schedules.
- Handle customer inquiries, quotes, onboarding, service updates, and issue resolution for both new and existing clients.
- Organize route details, customer preferences, property access notes, and service frequency to keep daily operations running efficiently.
- Built strong experience in customer service, business operations, time management, problem-solving, and client retention.

TEAPRESSO BAR - SOCIAL MEDIA COORDINATOR

Remote | January 2025-Present

- Managed social media content and digital marketing campaigns for a multi-location beverage brand.
- Organized content around business goals such as increasing foot traffic, improving brand visibility, and promoting customer participation.
- Applied user-centered thinking to create clear, visually engaging posts for customers across social platforms.
- Collaborated on marketing ideas while maintaining consistent branding, messaging, and campaign details.
